

RESERVIO

Week 7 Work Split

Each member has a dedicated page with their tasks, git commands, and resources.

Team Overview

Member	Team	Diagrams	Code This Week
Ina Ndoni	Frontend	US-09–12	Guest Portal screens
Eleana Zharkalli	Frontend	US-21–23	Staff + Housekeeping screens
Jorida Vrusho	Frontend	US-01–04	Hotel Admin screens
Klea Hila	CI/CD + Frontend/Backend	US-17–20	Super Admin + shared components
Orest Paja	Backend	US-05–08	Diagrams only
Licern Begiri	Backend	US-13–16	Diagrams only
Joni Begaj	Backend	US-24–26	Diagrams only

Ina Ndoni

Your Work This Week

Diagrams: Activity + Sequence for US-09, US-10, US-11, US-12 (staff dashboard, confirm, check-in, check-out)

Frontend: Build all Guest Portal screens with mock functionality.

Screen	What It Does (Mock)
Registration (US-01)	Form: name, email, password. Validate required + email format. Mock duplicate error. Success → login.
Login (US-02)	Email + password. Check against mock user. Error state. Success → dashboard.
Guest Dashboard	Welcome + name. Upcoming reservations (mock). Quick links to rooms, parking, sunbeds, marketplace.
Room Browsing (US-03)	Card grid: photo placeholder, type, price, description. No login required.
Availability Filter (US-04)	Date pickers. Client-side filter on mock rooms. Unavailable rooms hidden.
Reservation Flow (US-05)	Room detail → Book Now → confirm modal → add to state, show reference.
Parking Map (US-06)	Spot grid, green/red/yellow. Click → 5-min countdown. Confirm/cancel.
Sunbed Map (US-22)	Pool layout + numbered sunbeds. Time slot tabs. Same lock mechanic.
Marketplace (US-07)	Cards + category tabs. Cart. Bill to Room. Toast.
Notifications (US-08)	Dropdown with mock entries. Room + status + time. Badge count.

Git Commands

```
git fetch origin
git checkout code/frontend-ina
cd client && npm install && npm run dev
```

Mermaid Diagrams

- **Live editor:** mermaid.live — write, preview, export PNG

Activity diagram template:

```
flowchart TD
    A([Start]) --> B[User opens page]
    B --> C{Is user logged in?}
    C -->|Yes| D[Show dashboard]
    C -->|No| E[Redirect to login]
    D --> F([End])
```

Sequence diagram template:

```
sequenceDiagram
    actor Guest
    participant Frontend
    participant API
    participant DB
    Guest->>Frontend: Click Book Now
    Frontend->>API: POST /reservations
    API->>DB: INSERT reservation
    DB-->>API: Created
    API-->>Frontend: 201 + ref
    Frontend-->>Guest: Show confirmation
```

Eleana Zharkalli

Your Work This Week

Diagrams: Activity + Sequence for US-21, US-22, US-23 (room cleaning, sunbed, tenant mgmt)

Frontend: Build Staff Dashboard + Housekeeping screens with mock functionality.

Screen	What It Does (Mock)
Reservation Dashboard (US-09)	Table: guest, room, dates, status badges. Pending=amber, Confirmed=green, CheckedIn=blue, CheckedOut=grey. Filter by date + status.
Confirm Reservation (US-10)	Confirm button on pending rows. Click → badge changes to Confirmed.
Check-In (US-11)	Filter today's confirmed. Register Check-In → status=CheckedIn, room=Occupied.
Check-Out (US-12)	Select active. Process Check-Out → status=CheckedOut. Toast: "Housekeeping task created."
Room Status Grid (US-13)	Room cards + status dropdown (Available/Occupied/Maintenance). Color updates.
Priority Override (US-14)	Urgent button on task rooms. Toggles badge. Re-sorts list.
Task Board (US-20)	Cards sorted by priority: room, floor, check-out, badge. Urgent first.
Mark Cleaned (US-21)	Mark as Cleaned per card. Card removed, toast "Front desk notified."

Git Commands

```
git fetch origin
git checkout code/frontend-eleana
cd client && npm install && npm run dev
```

```

Jorida Vrusho

Your Work This Week

Diagrams: Activity + Sequence for US-01, US-02, US-03, US-04 (guest registration, login, browsing, availability)

Frontend: Build Hotel Admin screens with mock functionality.

Screen	What It Does (Mock)
Room Management (US-15)	Table of rooms. Add Room → modal (type, description, price). Edit/delete. Updates state.
Staff Accounts (US-16)	Table of staff. Add Staff modal: name, email, role (Staff/Housekeeper). Deactivate toggle.
Admin Layout Shell	Sidebar nav: Rooms, Staff, Pricing, Analytics, Parking. Header with hotel name. Wraps all admin pages.

Git Commands

```
git fetch origin
git checkout code/frontend-jorida
cd client && npm install && npm run dev
```

```

Your Work This Week

Diagrams: Activity + Sequence for US-17-20 (pricing, analytics, parking mgmt, housekeeping queue)

Infrastructure: Scaffold + branches + CI. Frontend: Super Admin screens + remaining Admin screens.

Screen / Task	Details
Project Scaffold	Vite + React + Tailwind. Folder structure, routing, mock data files, shared components, layouts.
Branch Setup	Create dev, code/frontend, and all code/frontend-{name} branches.
GitHub Actions CI	ESLint + lint on push. Branch protection on main and dev.
Dynamic Pricing (US-17)	Threshold input + adjustment %. Enable/disable toggle. Mock occupancy. In src/pages/admin/.
Analytics Dashboard (US-18)	KPI cards, date range filter, chart placeholder, export button. In src/pages/admin/.
Parking Mgmt (US-19)	Spot table. Add/remove. Per-spot price. Occupancy summary. In src/pages/admin/.
Tenant Mgmt (US-23)	Table: name, subdomain, plan, status, date. Approve/Suspend/Delete. In src/pages/superadmin/.
Subscriptions (US-24)	Change Plan dropdown per tenant. Confirm modal. Badge updates. In src/pages/superadmin/.
Platform Analytics (US-25)	KPI cards, date + plan filters, mock chart. In src/pages/superadmin/.
Onboard Hotel (US-26)	Form: name, subdomain, plan. Adds row. Success msg. In src/pages/superadmin/.
Super Admin Layout	Sidebar: Tenants, Analytics, Onboard. admin.reservio.com header.
